CENTRAL CONNECTICUT COAST YMCA 2021 Summer Day Camp Safety

Safety is our first priority.

All Central Connecticut Coast YMCA camps will follow all the guidelines set by the CT Office of Early Childhood (OEC), American Camp Association (ACA), Y-USA, and other sources to ensure our policies and procedures are aligned to keep our campers, staff and volunteers healthy and safe.

Health screenings:

- All staff, volunteers and children are required to be screened for any observable illness, including cough or respiratory distress, and to confirm temperature below 100 degrees Fahrenheit each day on arrival.
- Camp staff will be prepared to take campers' temperature with a touchless thermometer; parents may take their own child's temperature upon arrival, as long as they show the temperature to the drop off counselor. Thermometers will be disinfected.
- Staff or children who have a temperature greater than 100 degrees are not permitted into the program and are required to be unmedicated and fever free for at least 48 hours. Any staff or child that develops an elevated temperature or who may be ill, will be put into an isolated area until they are picked up.

Group size: All groups will have a limited size.

Face masks: All campers, Y staff and Y volunteers will wear face coverings while indoors at camp. While outdoors, masks are optional.

Hand hygiene: Regular hand washing with soap and water for at least 20 seconds will be done. If soap and water are not available, alcohol-based hand sanitizer will be available. Use of alcohol-based hand sanitizers will be supervised by staff.

- Before coming in contact with any child
- Before and after eating
- After sneezing, coughing or nose blowing
- After using the restroom
- Before handling food
- After touching or cleaning surfaces that may be contaminated
- After using any shared equipment like toys, computer keyboards, mouse

Cleaning protocol: Additional procedures will be put into place to ensure surfaces and areas are sanitized between usages, per guidelines put forth by the OEC. This will include surfaces and areas sanitized between usage with cleaning products approved by the OEC.

Communications: If a child or staff member who has been present in the program is diagnosed with COVID-19, camp will notify families and staff of the program about the exposure.

6/8/2021

Please note that these protocols are important to ensure the health and safety of our children, families, volunteers and staff. All safety measures are subject to change per State of CT, Governor Lamont, Health Department or YMCA needs.
